Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**Sarasin Global Dividend,
a sub-fund of Sarasin Funds ICVC
Class P Acc**

ISIN:GB00BGDF8F44

This Fund is managed by Sarasin Investment Funds Limited

Objectives and Investment Policy

Objective

We seek to grow the Fund over a rolling 5 year period after deducting fees and costs and to provide 15% more income than the MSCI All Countries World Index (Net).

Investment Policy

We invest at least 80% of the Fund in the shares of companies from around the world. We can also invest in bonds, other funds (including those managed by Sarasin) and cash.

The Fund is actively managed and we select companies from any country/region, sector or industry. We identify the long-term investment themes that drive growth and lead to disruption in global economies and industries. We select companies based on our own analysis of which are most likely to benefit from these themes, are well placed to grow their revenues and cash flows as result of these themes, and whether they provide attractive income levels, as a result of these themes.

Integral to this analysis is an in-house tool devised to examine and quantify any material environmental, social and/or governance ("ESG") factors. A comprehensive assessment of the related risks and opportunities resulting from these factors are then embedded within our financial modelling and analysis of companies.

The Fund will not therefore always exclude holdings for which material environmental, social and/or governance risks have been identified.

We engage as far as possible with companies to promote actions to mitigate material ESG risks identified with priority given according to the materiality of our concern, the size of our holding, and also our view of the ability for engagement to have a meaningful impact. Voting is integral to

our engagement work and we seek to ensure our voting is aligned with our engagement priorities.

We may only use derivatives to maintain the Fund's value, manage investment risk and to gain cost-effective access to investments. Derivatives are financial contracts whose value is linked to the price of another asset (e.g. indices, rates, share prices, currencies).

The Fund's performance can be assessed by reference to the MSCI All Countries World Index (Net) over rolling 5 year periods as this represents the performance of shares of companies from around the world.

The Fund's income can be assessed by reference to the income produced by the MSCI All Countries World Index (Net) on an annual basis as this represents the performance of shares of companies from around the world.

Distribution Policy

Any income due from your investment is reflected in the value of your shares rather than being paid out.

Dealing Frequency

You can buy and sell shares in the Fund before 12 noon GMT on any business day in London.

Recommendation

This Fund may not be appropriate for investors who plan to withdraw their money within 5 years. For full investment objectives and policy details please refer to the Prospectus. For further details on the Fund's sustainability approach please refer to the SDR Consumer Facing Disclosure document.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the fund ranks in terms of its potential risk and return, calculated using the volatility of monthly returns over five years. As it is based upon how the fund has performed in the past, you should note that the fund may well perform differently in the future. The risk category shown is not guaranteed and may shift over time.

The higher the rank the greater the potential reward but the greater the risk of losing money.

The Fund is ranked at 5 reflecting observed historical returns. The fund is in this category because it has shown higher levels of volatility historically.

The following risks may not be fully captured by the Indicator:

- Operational Risk: Operational risks arising from a failure or delay in operational processes and systems, or the failure of a third party provider may affect the value of your investments. Where this results in compensation needing to be paid, this may be paid some time after the original loss is experienced.
- Counterparty and Settlement Risk: The fund may enter into derivative transactions in over-the-counter markets, which will expose the fund to the credit risk of their counterparties. The fund may be exposed to the risk of settlement default where the counterparty may default on its obligations to perform under the relevant contract. In the event of the bankruptcy or insolvency of a counterparty, the fund could experience delays in liquidating the position as well as significant losses, including declines in value during the period in which the fund seeks to enforce its rights.
- Charges deducted from capital: The Fund has charges deducted from capital. This may reduce the potential for growth.
- Further disclosure: See "Risk Factors" in the Prospectus for more information about risks.

Charges

The charges you pay are used to pay the costs of running the fund

| One-off charges taken before or after you invest | |
