Portfolio objective

The portfolio aims to achieve capital growth over a period of five years or more, while managing the Environmental, Social, and Governance (“ESG”) risk of the portfolio and maintaining a smaller carbon footprint than the reference index. The portfolio will have exposure to a diversified range of investments in the UK and globally by investing in funds that we identify as leaders in the integration and management of ESG factors.

In addition to meeting these criteria, at least 50% of the portfolio’s assets will be in funds that pursue explicit environmental and/or social targets or characteristics as part of their investment process.

The portfolio is matched to a risk profile that targets a specific range of volatility of between 35% - 45% of the expected annualised volatility of global equities over the next 10 years and is managed to stay within this range most of the time.

Whilst the portfolio is actively managed, it will typically hold a minimum of 35% of its non-cash assets in passive investment vehicles that feature ESG screening.

## Glossary

### Performance comparator

An index or similar against which we invite investors to compare the performance of the portfolio. The IA Mixed Investment 20-60% Shares sector is representative of funds with exposure to a broad mix of asset types. The allocation of the portfolio to these asset types may be different. Therefore, the performance of the portfolio and the performance comparator may differ significantly.

### Volatility target

The portfolio targets a range of volatility rather than a particular level of growth. Volatility is a measure of how much the returns of an investment are likely to fluctuate over time. Higher volatility can indicate higher risk.

### Weighted fund charge

The average of the charges of the funds held in the portfolio based on their weight within the portfolio.

### MPS charge

The amount charged annually by Quilter for running the portfolio. The charge is expressed as a percentage of the investment held within the portfolio.

## Need additional help reading documents?

More and more of our investors are using screen reading software as a quick and easy way to read their documentation if they are blind, partially sighted, or dyslexic. Alternatively, we can write to you in several alternative formats, such as large print, braille, audio, and OpenDyslexic font. Find out more about screen readers, accessing your documents online, and our alternative format options at [quilter.com/document-help](https://quilter.com/document-help).
