What is this product?

Type

The Company's shares are listed on the premium segment of the Official List of the UK Listing Authority ('UKLA') and are admitted to trading on the main market of the London Stock Exchange.

Objectives

The Company aims to provide capital growth and a rising share price over the longer term from Continental European investments by out-performance of the benchmark by taking carefully controlled risks through an investment method that is clearly communicated to shareholders. The Company has the ability to use borrowing to gear the portfolio within the range of 10% net cash to 20% geared in normal market conditions. Gearing may magnify gains or losses experienced by the Company. The Company pays four dividends per financial year in July, October, January and March and calculated as 4% per annum based on the NAV as at close of business on 31st March of the preceding financial year.

Intended retail investor

The Company is offered to investors who may have basic or no knowledge and experience of investing in financial markets and also experienced investors and is intended for long-term investment. Investors should understand the risks involved, including the risk of losing all capital invested and must evaluate The Company's objective and risks in terms of whether they are consistent with their own investment goals and risk tolerances. Shares in The Company are not intended as a complete investment plan.

The Company has been established with an unlimited life.

What are the risks and what could I get in return?

Risks

Lower risk ← → Higher risk

1	2	3	4	**5**	6	7

The risk indicator assumes you keep the product for 5 year(s).

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
We have classified this product as 5 out of 7, which is a medium-high risk class.

This figure rates the likelihood of losing money in the future, based on historic prices as having a medium-high level risk.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the Annual Report in the documents section at www.jpmam.co.uk/investmenttrust.

Investment performance information

The performance of the Company is likely to be driven by a variety of factors, whether macro (e.g. political, economic growth, inflation) or the performance of individual corporate issuers. The Company may utilise gearing (borrowing) which will exaggerate market movements both up and down. The Company has chosen the MSCI Europe ex UK (total return) (£) as its benchmark and has the objective as stated in the "What is this product" section. There is no guarantee that the Company will meet its objective or achieve any particular level of performance. For further details of the risk factors which may impact the performance of the Company please refer to the Company's annual report which is available at www.jpmam.co.uk/investmenttrust.

What could affect my return positively?

Factors such as strong economic growth, low inflation and/or strong corporate earnings are likely to impact the return of the Company positively.

What could affect my return negatively?

Conversely, low economic growth, high inflation, poor corporate earnings and/or the default of issuers are likely to impact the return of the Company negatively.

Outcome the investor may expect where shares in the Company are encashed under severely adverse market conditions

Shareholders are more likely to experience a negative return should shares be encashed under severely adverse market conditions.

What happens if JPMorgan Funds Limited is unable to pay out?

The Manager is responsible for administration and management of The Company, and does not typically hold assets of The Company (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The Manager, as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if The Company or the depositary is unable to pay out. Investors in The Company are not eligible to claim under the UK Financial Services Compensation Scheme.

What are the costs?

Following the Financial Conduct Authority's update in September 2024, investment trusts no longer need to follow the previous cost disclosure rules under PRIIPS.

We follow the Association of Investment Companies' (AIC) guidance to share an Ongoing Charges figure. Therefore, the Company has made relevant changes to this document.

As a UK-listed investment trust, the Company incurs Operating Costs in respect of its ongoing management and these are disclosed in the Income Statement and related notes in the latest audited Annual Report & Financial Statements ('ARFS'). The Ongoing Charges show our Operating Costs as a percentage of our average net assets from the previous year. The latest Ongoing Charges (0.66%) can be found in the Financial Highlights section of the Company's **ARFS** and in the Company's **factsheet**. For the avoidance of doubt, the Ongoing Charges are not an additional cost borne by shareholders of the Company. The Reduction in yield (RIY) shows what impact the total cost you pay will have on the investment return you might get. "The Company's share price already reflects market sentiment of its value taking into consideration publicly disclosed information on expenses, which are already disclosed in the ARFS and other public disclosures.
