* The target benchmark for the fund is the MSCI World Index. The MSCI World Index is representative of the companies in which the fund typically invests and is therefore considered an appropriate benchmark for the fund to seek to outperform and against which its performance may be assessed.

** The ongoing charge is the total of the fixed ongoing charge and any discounts applied. More information on the charges and expenses applicable to this portfolio can be found at quilter.com/charges-and-expenses.

*** The historical yield reflects distributions paid or declared over the past twelve months as a percentage of the mid-market share price as at the date shown. It does not include any initial charge and investors may be subject to tax on their distributions. Please remember that yield figures are as at the last day of the month and may go down as well as up. The yield may fluctuate significantly during times of extreme market volatility.

Risk factors

Investment risk - there is no guarantee that the fund will achieve its objective. A capital loss of some or all of the amount invested may occur.

Capital erosion risk - the fund takes its charges from the income of the fund in the first instance. The impact of fund charges may be material on the value of any income you receive from your investment. There is potential for capital erosion if insufficient income is generated by the fund to cover these charges. Capital erosion may have the effect of reducing the level of income generated.

Currency risk - the fund is denominated in British Pounds but holds assets denominated in other currencies. The value of your units may rise and fall as a result of exchange rate movements.

Derivative risk - the fund may use derivatives for Efficient Portfolio Management (EPM). Derivatives involve a level of risk, however, for EPM they should not increase the overall riskiness of the fund. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.

Company shares (i.e. equities) risk - the value of company shares may rise and fall due to the performance of individual companies or because of general market and economic conditions.

Concentration risk (number of investments) - the fund may at times hold a smaller number of investments, and therefore a fall in the value of a single investment may have a greater impact on the Fund's value than if it held a larger number of investments.

Strategy risk - the fund invests in sectors and companies using an ethical investment strategy. This means the range of the fund's investments may be more restrictive, and consequently the fund may be less diversified than other investment funds.

For a more detailed explanation of risks, please refer to the "Risks" section of the prospectus.
