Why is this Sub-Fund in this category?

Are there any other particular Risks?

Risks to which the Sub-Fund may be exposed and which may not be reflected in the indicator:

- **Liquidity risk:** The Sub-Fund may be exposed to less liquid securities. Those are securities that cannot easily be sold or exchanged for cash without a substantial loss in value in certain market conditions. Those securities also cannot be sold quickly because of a lack of ready and willing investors or speculators to purchase the asset.
- **Third parties risk:** The failure of the third parties on which the Sub-Fund's operations depend may cause disruptions and losses.
- **Emerging markets instability risk:** Emerging markets may be subject to political, fiscal and/or economic instability that may imply opportunities for investors but also greater risks.
- **Operational risk:** The Sub-Fund may fall victim to fraud or criminal acts. It may suffer losses as a result of misunderstandings or mistakes by employees of the Management Company or by external third parties or may be damaged by external events, such as natural disasters.
